AOChem Home Visit for Chronic Sores/Injuries…

Medical Benefits:

- Chronic-Sores like Diabetes-sore.
- Wounds that refuse to heal.
- Chronic injuries that refuse to heal (Sports injuries, motor accident injuries)
- Sun-Burns
- Burns.
- Chronic-Rash
- Breast Cancer
- Prostate cancer

Skin-sores(ulcers) can be categorized into groups like arterial ulcers. Venous skin ulcers, diabetic foot ulcers, malignant ulcers and etc. The common cause here is poor circulation, poor blood supply and nerve damage (nervous-system malfunction). We also use a good balanced dose of the African-Potato (iLabatheka), this beast of a herb is amazing for Circulation, vein-health (Nutrition), fiber and magnesium, beryllium, lithium ALL in the purest natural form. The herb also has the silicon element which is superb for the joints, Silicon glues things together. Wait, did I mention the helium benefit the herb has?? What a smoothie for the bile. Herb-helium is everything to the bile, pancreas and appendix because those 3 organs have diluting characteristics. All I'm saying is: You just have to have a strong bile to have an immaculate CD4 count.

Normal Sores come from falling??bruising??Getting hit by something?

Sores that just randomly appear on the skin are an indication of rot internally. Internal rot comes from a lot of factors like a burst vein, rotten vein, clogged vein and other medical reasons like a lack of vitamin E and C in your skin-Cells. This highly affects the skin pigmenting process which is more like a dilution-cover, that primarily acts as a protection-cover for the skin. The vitamin E in our products adds nutrition to pigmentation. Vitamin C is dense so it penetrates through all skin-layers. In military we believe that the 1st line of defense is imperative, which is the first layer of the Skin that is exposed to gas emissions. The Sun, Dust and bacteria. BUT don't worry AOChem has got the solution with our products filled with Natural-Nutrition.

How its prepared??

Very Simple Steps:

1. The Client Books an appointment.
2. AOChem trained Reps will show up to your door step.
3. Treatment will then begin.

The treatment procedure is very simple:

- **AOChem Skin-Spray** – (To spray on the sore), the spray acts as a disinfector, removes dead/Rotten Skin
- **AOChem All in one oil** – (After waiting for the Skin-spray to dry up on the sore), drops of oil are then evenly-applied on the sore to get the skin-cells to recover because the sore is not the problem, the problem is with what is causing the skin-cells to rot and die.
- **Good-Dose of AOChem Tea** – For the patient to drink whilst treatment is being conducted (the aim is to initiate recovery from internally whilst we initiate recovery externally via AOChem External-Products). We close in from all directions on the bacteria ensuring the threat is silenced in the process.
- **AOChem infused Patches** – (These patches are infused in AOChem oils), we place them on the sore and the patient is ordered to keep it on the sore for a minimum of 4-12 hours Max. (If patient has errands to run, then we recommend they cover the sore but having the AOChem infused-patch as the base. Basically: place the AOChem Patch on the sore and put a bandage over it. The patches are made from special leaf's that come from a special tree. The leafs are super high in Potassium which is responsible for quick: recovery, repairing, enhancing and purifying. The Patches(leaf) are mixed with AOChem oil-mixtures to add more strength to the patch …" HERB PARTNERSHIP"

So yes, you probably could do it by yourself at home by just getting all the AOChem products listed above and follow treatment steps. Simplicity is the mission of AOChem. AOChem always opens the table for elderly people and the handicapped, we are always willing to assist but if you can do it yourself why not do it? You save a coin. Alternatively, we schedule a home-visit with the client and as we conduct treatment you can just observe and take notes and then

proceed with treatment. “The AOChem products are the key-factor” to the entire treatment process.

"When the vein starts to rot from within, it contaminates the skin-cells and that’s how the sore just pops out on a random Tuesday (Rot). It’s basically the body saying: 'I am rotting from inside'."

Sores that erupt randomly can be caused by a lot of underlying factors like Nutritional-deficiencies e.g., Lack of Fiber, magnesium, Vitamin C and K, Imbalance of Insulin Levels which automatically causes a PH-imbalance... Such nutritional deficiency come with a lot medical complications like diabetes and anemia etc. These deficiencies result to a low blood-supply. When there is no operation or movement in the veins, the veins dry off and rot. Individuals that are too overweight end up popping their veins due to the fat-content stretching within the veins. Body builders too, that use too much gear(steroids), they get too big and muscles start stretching way above the safe-working-load, evidence of that would be stretch-marks which are a visual indicator to the patient that the body is stretching way above restriction. This suffocates the veins and contaminates the blood, resulting to sores, rash and all sorts of skin-disorders even Numb skin in extreme-cases. When the vein starts to rot from within, it contaminates the skin-cells and that’s how the sore just pops out on a random Tuesday (Rot). It’s basically the body saying: “I am rotting from inside”. Extreme cases will result to limb amputation and etc. AOChem is not about the amputation life.

The common cause for all these medical-complications is the food and medication we are consuming that are lab-produced(processed) and carry high contents of metallic-substances which are against the immune-system of any living-organism.

Chronically ill patients eventually will need to meet with Dr Msomi just to properly talk about that disease that’s eating your life away, on a deeper scale. I think the info displayed on the website is just a tint of info Dr Msomi still has to share. Dealing with sickness requires you to have an idea of the time-frame of the illness, this assists Dr Msomi into knowing how much

dosage of which herb should be increased or decreased e.g., if you are short of iron, Dr Msomi will increase the dose-volume on herbs that are high in potassium.

PRICING & CONSULTATION

It all depends on how long you have had the skin-dysfunction.

For Early skin- dysfunctions:

- 1 AOChem oil
- 1 AOChem Skin-Spray
- 1 AOChem Nutritional Tea

For Chronic Skin-Dysfunctions:

(You receive 2 weeks' worth of treatment)

- 15 litres of Concentrate AOChem nutritional bath tea x 14 days (2 weeks)
- R1200 x 14
- **Total: 16 800**

This particular AOChem treatment methodology is basically like a car-wash for your skin-Stems cells, but not only for the skin-cells but for the entire body…because you soak yourself in the bathtub, why?? When there are stains that refuse to o away on your clothes, you soak them for longer to 'ease- up' the chemicals that latch on like a bitter ex-partner. You even soak them longer because you want them to look extra shinny and bright (white clothing). that's the approach AOChem is implementing on your entire immunity of your stem-cells via the AOChem Nutritional Bath-Tea. Certain sores that have liquids (ubovu, or any unpleasant discharge) FREQUENTLY coming-out from them do not require too much water(moisturizing) hence why it really then becomes imperative to consult Dr Msomi. Visuals help a lot in treatment-diagnostics (pictures, video-calls, face to face), hence why the option of walk-ins is available. Dr Msomi lives in a Township called Umlazi (D Section) in Durban, he works from home where he does medical and spiritual works from.

By the way, it's me Dr Msomi that's typing all of this info, my website guy is doing the design and coding. I felt I had to do the info part (writing & editing) myself because it's too complex. The message has to be clear to the consumer of What AOChem treatment is all about.

Interesting Facts:

A glass of 100-percent pomegranate juice mixed with 2 spoons of the AOChem nutritional tea on a hot Saturday is beneficial to your stem-cells. I speak about stem-cells so much because they are the building blocks of lie, they MATTER! Then I tackle the bile, pancreas and Appendix. You are probably asking yourself," Dr Msomi so why don't you just sell the Concentrated AOChem Nutritional bathing-Tea on its own because the preparation steps are really not complicated". AOChems' mission is to be able to assist both males and females, young and old and truth is; Some people require an extra helping hand, so AOChem opened up the table to that but if you can do the necessary preparation steps on your own or with your family members, teammates, coaches, your sports medical department, then you are welcome to just purchase the Multi-Nutritional Bathing Tea.

Amongst many herbs, the AOChem bathing concoction has a very special herb called 'uNwele', this is a monster of a herb and is truly amazing for the Nervous-System, which is also known as the body's primary communication and control network. Logically life is very hard when the network is down and no relationship is functional where there is poor communication. Therefore, it's important for the Nervous-System to be fully functional and enhanced with natural nutrition not steroids.

When you talk about an ICE-BATH a lot of individuals think it only applies to athletes. Yes, if you are just doing the ice-bath with just water and ice, then I prefer it for athletes, but once we throw in an element of herbal treatment. The AOChem ice-bath methodology opens the table to everyone not just athletes. "Medication is for all."

Conclusion

Anything that is kept frozen adds shelf life to a product(preserves). The AOChem nutritional Ice-Bath is just a pure bliss for the stem-cell life longevity. "A Petrol station for anti-aging treatment"- AOChem nutritional Ice-Bath.

Pricing

Normal bathtubs take 150 - 250 litres of water, but AOChem treatment only needs 150 litres of water in your bathtub or slightly less., which is then mixed with 15 litres of CONCENTRATED AOChem Nutritional Bath-Tea…….

- **15 litres of AOChem Nutritional bath-Tea: R1500**
